Project Part #2 - The Haskell Backend, or . . . Functional Programming

Anders Kalhauge

Spring 2021

In this part of the project you should create a Backend for your Elm frontend **OR** you can make any other Haskell project of similar complexity ☺

Inspiration to the project can be found at:

`https://github.com/datsoftlyngby/dat4sem2021spring-fun.git`

Hand in

A link to the github repository. In groups on Peergrade no later than Friday April 9th .
