Project Part #1 - The Elm Frontend Functional Programming

Anders Kalhauge

Spring 2021

This is the frontend part of the project for Functional Programming.

The model

Create a simple Elm application a frontend for the endpoint, you created in Part #0. Be proepared to refactor both the Elm application and the endpoint along the path, when you get more experienced.

Document your code in an `README.md` file in the program repository.

It is allowed to use the same repository as the one from Part #0.

Hand in

A link to the github repository. In groups on Peergrade Monday March 22nd no later than 13:00.
